TO WORK THE INDEPENDENCE IN PIKE'S DIGGINGS

Mining In Nevada - Hobble Creek Marble - Eastern Builders Well Pleased With This Utah Production-Northern Light Active-The Afternoon Call-New Exchange.

Thomas Martin, of Stateline, who is n the city, talks most interestingly regarding this promising gold and silver camp and its outlook for the future, and he says that there is now more activity there than for months past, and that quite a number of sales of mining property nave been recorded in that section of late, it being more says than of yove for the prospector and claimholder and the investor to get 10-

lease, and it is evidently the making of a mile.

In Pines' Diggings, according to Mr. Martin, the outlook is most flattering and considerable development is in progress there, the independence Mining company, of which L. P. Marix is precident, having just let a contract for 190 feet of sinking and 100 seet of drifting to theorem Blakeley, of the blakeley group, which is showing up in a most gratifying manner with development work. Mr. Marin stating that the Coffey group has just been secured by Dr. Harvey of this city on a bond and lease.

Dr. Harvey of this city on a bond and laste.

In Deer Lodge work is progressing racely in the deepening of the Horse. Shoe shaft on a fine body of ore, while a force of ten men is at work in the development of the Buck.

Besides gold. Stateline is likely to became farmed for its copper mines, as Mr. Maytin says that before leaving the camb for Sait Lake some fine samples of copper ore were brought to Stateline by prespectors from the same range at a point about fourteen miles distint to the northeast.
